

A Better Solution for Construction Site Washout.

Outpak Washout® unit is designed to be a portable solution for harmful industrial concrete sediment, paint, dry wall mud, stucco, and mortar. With Outpak Washouts your job site will be organized, eco-friendly, and BMP compliant to avoid costly fines. They are designed for a simple and quick set-up in minutes and can remain for the duration of the project. Outpak Washout is compatible for secondary bucket containment and waste water washout. Dispose of after evaporation or in conjunction with Outpak Slurry Solution.

Outpak Corrugate Washout is a Universal, “portable” washout. Good for paint, drywall mud, stucco, mortar and concrete. Dispose of after job completion or reuse.

Easy Setup

- Easy set up
- Disposable
- Reusable for paint washout (With Outpak Slurry Solution)
- Recyclable
- A Secondary containment, (to keep buckets from spilling)
- Paint washout for sprayer rollers, brushes
- Leave solidified wash water on site
- No need to haul off wash water
- Multiple sizes

AVOID COSTLY EPA FINES

The maximum fine levied by the Environmental Protection Agency is \$11,000.00 PER DAY, PER PROJECT. A large national retailer recently paid \$7 million in fines. Don't be the government's next victim. Prepare for enforcement within the city or county you are working in by purchasing Outpak Washout products. Outpak Washouts are the most cost-effective, construction site, washouts.

LIMIT YOUR ONSITE LIABILITY

Some construction and paint companies are resorting to “kiddy” pools for their construction site washout needs. Imagine the legal problems you could face if a child ever found his or her way into a pool with a water pH balance equal to Liquid Drano. Can you say, “lawsuit?”

SAVE TIME & MONEY

There is no faster or co cost-effective way to manage construction site washout.

Outpak Washouts are:

- Easy to store
- Easy to deploy
- Easy to dispose

DO THE RIGHT THING!

The president and founder is a veteran of the concrete construction business, and he's a native Idahoan. That means he appreciates what Mother Nature has provided. He values being a good steward of the land, by providing affordable and efficient eco-friendly development.

Outpak Slurry Solution

Outpak Slurry Solution is specifically designed to help you save time, money, and labor at your job site.

Our innovative product makes your slurry waste cleanup easy and efficient. Just solidify the slurry waste and throw it away in any standard waste container. The material becomes EPA compliant and landfill ready.

We have been in the concrete construction business since 1981 specializing in foundation and flatwork. In 2008 local inspection agencies began enforcement of the Federal Clean Water Act resulting in the implementation of Best Management Practices (BMP's) for erosion control and sediment containment. The most significant change was the requirement of an onsite washout prior to footing inspection.

Many contractors and job sites began building lined pits or above ground straw bale containment. This obviously took time, money and focus away from the actual construction work. After analyzing other washout solutions, we saw the need for a universal washout that was easy to procure, store and deploy. One that also would be able to accommodate mixer trucks, pump trucks, wheelbarrows and other equipment.

So at Outpak, Inc., we created Outpak® Washout Systems to offer a wide variety of concrete washout and other spill containment solutions. Over time contractors saw the ease and convenience of Outpak Washouts and began using them for other construction materials including paint, stucco, drywall mud and mortar. Outpak Washout – A Better Solution for Construction Site Washout.
